A Monster Airship.

Reports having been coming out from Ger many for months regarding an immense air plane in course of construction at the Dornler company a Swiss plant at Altenghein on Lake Constance The sector, which has been maintained regarding the mighty alrabic baying been removed by the Dornier people this week t is now known that the great machine may belter be described as an all boat than an airplane, for an air boat is essentially what it is-a hoat built along sharp lines which 's capable of taking off from and alight ing upon the san or any other considerable he churned up by a storm of near gale inten-sity—a boat which is equipped with mighty wings spreading 160 feet, powered by their 525-horseponer motors and capable of tarry ing 100 nassengers and its crew of fourteen at speeds ranging from 120 to 150 miles an hour a distance of 650 miles or from sevents to eighly passengers at somewhat lesser speed than 100 miles an hour for from 900 to 1,000 miles

The 'mmensity of the new air liner may be appreciated when it is stated that the corrl dor on the main deck which divides the social rooms from the sleaping cabins is seventy five feet long. This deck is exclusively for the use of passengers the one below it for the storage of supplies including 3 800 callons of gas and three extra motors and extra propellor blades, the motors being so in stalled in gondolas on the wings that replace ments may be made while the liner is in the air The top deck is for the exclusive use of the officers and the crew and the motors are so controlled that half or all of them may be cut off by one motion

It has been the rather general view of aviation experts that the carrying of any considerable number of passengers would be limited to dirigibles at least for some vers to come but if the tests of this big air liner pro e if to be all that has been anticipated of it a heavier than air muchine will be the first to carry anything like a passenger list of a hundred, and it will hint at the possi bility of the use of some liner along similar lines which may carry three or four score passengers in transatlantic hights,

Crime and the Automobile.

In a recent tasue the Loudon Fort ga d ; in commenting on the seve **en per cept, in crease in the number of indictable offenses committed in Logland last year

It is decorrerling to find that ter mala incremer has been in the category of offens angainst the person * * * The nation is be coming free fustead of more law abiding and the character of the offenses is more rathe than less actions

Coming from England even jet noted for ts comparative freedom from crime, the Posts statement is decidedly susprising. An increase of generateen per cent in crime in ; England in one year affords ground for mobiles in Great Britain and particularly in the big population centers of England? Why hould not the rule which holds. here hold good over there? Ther is an inclination to hold firearms responsible for the increase in crime but the utter untenabilli, of that year can be appreciated when at tention is called to the fact that there is many times a greater volume of crime today when thern are in many states restrictions igainst the sale purchase or possession of pistous and resolvers and probables in most states than there was when no res rictions whatever were placed upon the stile or purchase of one hand guns saved of shotku is or machine guns

But now consider the case of the automobile is it not a fact that crime has shown a stondy increase ever since the automobile came into general use? Itas not crime been facilitated and the chance for a gelinny been immensely advanced since the speedy motor car become generally popular, Does not the automobile figure more largely in bank and payroll robberies than the guns of those engaged in them? We firmly believe that the motor car has done for more to in crease crime than any other agency

But while feeling as we do concerning the automobile we ulterly refuse to ablyter over the dire possibilities which may come from the use of girplanes by criminals. They may be employed in sinusciles and in works of revenge as they no doubt already have been but they can never be employed for bank robbertes payroll sobberies holdups and aimilar crimes. An airplane can not be flown and similar crimes. IN COOL WEIGHT FABRICS

THESE comfortable two piece suits are a necessity during the hot days if you want to keep a cool, unwilted appearance. We have never shown a more beautiful variety of summer-weight fabrics in cool colors and patterns. Correct style is evidenced by the broad shoulders, peak lapels and the neat trousers. And the fine tailoring results in graceful modeling.

CAR STOCKS DECLINE

Bears Are Squeezed After Misjudging Trend of Brokers' Loans

By W. S. COUSINS I. N. S. Financial Editor I. N. S. Financial Editor

NEW YORK, July 12—Sky-rocketing prices for a few of the gas and
electric light stocks in the busiest
market of the month today were offset by continued weakness in the
motor stocks and specialities. During
the first hour of the afternoon, the
hears were budly squeezed in thforenoon and had to pay the price of the misjudgment relative to brokers

loans, but strong investment buying of the utility stocks was an import and factor in the brilliant advances of the favorites in this group.

Despite record-breaking earnings in the first half of the year for General Motors, Studebaker and other meditances are stronger to the stronger of the stronger eral Motors, Studebaker and other, we'l known motor car manufacturers, the motor stocks were again thrown on the market today by traders who argued that competition and price cutting will interfere with earnings in the second half. screased Demand Given as Reason: 25 Cents Per Mile New Rate ROOSEVELT FIELD, N.

ROOSEVELT FIELD, N. Y.,
July 12-A drastic cut in the prices
of airplane trips from New York to
all sections of the country gas announced here today by the Roosevelt
Flying Corp. the operating subsidiary of Roosevelt Field, Inc. Increased demand of the public for airplane travel made the reduction possible, Seth Low, president of Roosevelt Field, Inc., declared.

The price cut, which makes the
cost of sirplane travel for each pasrenger approximately 25 cents a mile,
regardless of the distance covered,
also marks discontinuance of the
practice of including charges for the
return trip, whether or not the pas-

return trip, whether or not the passenger takes advantage of it.

French Novelist Wins Praise

JEAN GIONO, an obscure young

JEAN GIONO, an obscure young bank clerk in the small provincial town of Manoeque, has won the 25000 franc Prix Brentano with his first novel. "Hill of Destiny," it is announced by Brentano's.

"Hill of Destiny," was published in Paris under the title of "Colline," it deals with the pessants of France and the life they wring out of the bowels of the earth. It is said to be an unusual novel.

Mr. LeClercq, of the Department of Romance Languages at Columbia university, who headed the selecting jury, will translate the book into English. It will be published this fall. The other members of the selecting jury were Lewis Galantiere and Malcolm Cawley. The unanimously chose this book from the 200 Franch novels submitted.

chose this book from the 200 French novels submitted.

Giono, the outhor, is 30 years old. He was born and raised in the town of Manusque, which nessles in the faothills of the Alps in southern France. Until the publication of "Hill of Destiny," his first novel, be was anknown in France His only other published works appeared in a small magazine edited by a friend of his, apharmacist. Living in the most modest circumstances Glono wrote in his apare moments and with no hope of monetary reward. The winning of the 25,000 franc award, the richest international literary prize with the exception of the Nobel prize, has made it possible for Giono to give up his electing and to devote his time entirely to literature.

The prize, which this year is awarded for the first time is to be an annual one. Any novel published in France between March 1, 1023 and March 30, 1930 will be eligible for consideration for the 1930 award.

including Touring, Roadster, Coupe, Cabriolet, Victoria and Scdan Models

TRICED TO GIVE YOU GREATEST VALUE

ONSIDER the delivered, fully ash "400" Sedan, and you'll see immediately it is a car you certainly should consider, when you get ready

For here, at a delivered, fully equipped price much lower than you would expect to pay for a car of its size and character, is an *Advanced Six* "400" Sedan with the Twin Ignition, high compression, valve-in-head, 7-bearing motor—with the beauty and style that have made the "400" a heavy favorite among all the year's new cars-and with a host of other costly-car features never available before in this price field.

Such features, for instance, as Bijur Centralized Chassis Lubrication which oils 29 chassis points at the pressure

of a pedal. And alloy steel springs in-dividually designed for its size and weight, correlated with Houdaille, double-action, outboard-mounted, hy-draulic shock absorbees. And the "world's easiest steering"!

These are only a few of the features of this Nash "400", but they give you are idea of its greater value and the extraordinarily fine performance you may expect from it.

The delivered, fully equipped price on this, and on all "100" models is lower, for the simple reason that all this equipment—Bijur Centralized Chassia Lubrication, Houdsille hydraulic shock absorbers, bumpets, spare tire lock, and the cover—is installed at the factory and included in the factory price. Some dealers charge as much as \$50 to \$60 extra for bumpers alone.
